

1 Грамматика

```
letter = "a" | "b" | ... | "z" | "A" | "B" | ... | "Z" ;  
digit = "0" | "1" | ... | "9" ;  
newline = "\n" ;  
identifier = letter | letter , id_tail ;  
id_tail = symbol | symbol , id_tail ;  
symbol = letter | digit | "_" ;  
program = let_block, term | term ;  
let_block = let_binding | let_binding , let_block ;  
let_binding = "let" , identifier , "=" , term , newline ;  
term = lambda_expr | unit_sequence ;  
unit_sequence = unit | unit , unit_sequence ;  
lambda_expr = "\" , id_list , "." , term ;  
id_list = identifier | identifier , id_list ;  
unit = identifier | "(" , term , ")" ;
```

2 Пример1

\x y.x

1. program -> term
2. term -> lambda_expr
3. lambda_expr -> "\" , id_list , "." , term
4. id_list -> identifier(x) , id_list
5. id_list -> identifier(y)
6. term -> unit_sequence

```
7. unit_sequence -> unit
8. unit -> identifier(x)
```

```
\x y.x
```

3 Пример2

```
let I = \x.x
I z
```

```
1. program -> let_block , term
2. let_block -> let_binding
3. let_binding -> "let" , identifier(I) , "=" , term , newline
4. term -> lambda_expr
5. lambda_expr -> "\" , id_list , "." , term
6. id_list -> identifier(x)
7. term -> unit_sequence
8. unit_sequence -> unit
9. unit -> identifier(x)
10. newline -> "\n"
11. term -> unit_sequence
12. unit_sequence -> unit , unit_sequence
13. unit -> identifier(I)
14. unit_sequence -> unit
15. unit -> identifier(z)
```

```
let I = \x.x \n I z
```
